

REAL-TIME ORDER TRACKING

osf.digital

DELIVERY STATUS SYNCHRONIZATION FOR INCREASED CUSTOMER SATISFACTION

Integrator for STARKEN makes the order process much more convenient for your valued shoppers. Our product works with your Salesforce Commerce Cloud website to instantly provide your customers with shipping and tracking information from STARKEN — a leading Latin American logistics company offering distribution to more than 190 countries.

Shoppers will obtain an order tracking number and a quick view of the delivery status of their purchases via your online store. They'll never be left wondering where their purchase is at and will appreciate the care you put into assuring them that they are at the front and center of your business.

FEATURES & BENEFITS

According to a recent study, **75%** of online customers believe that offering an order tracking service has become a necessity for online retailers.

Rakuten

INCREASE SITE VALUE

Offer instant access to a tracking number and provide a quick overview of the order status immediately after customers complete the checkout process on your online store.

EFFICIENT SITE EXPERIENCE

Visitors aren't required to log in to your website and can navigate as a guest user. This provides them with the order information that they're seeking from you without wasting their valuable time.

INCREASE TRANSPARENCY

Provide your customers with the ability to access the most recent, accurate and detailed information available for their orders. Shipping data is synchronized with STARKEN to show details at each step of the delivery process.

REDUCE COSTS

Empower your customers to check the current status of their order on their own. Minimize inquiry calls and cut down on business expenses.
