

OPTIMIZE THE CHECKOUT PROCESS

osf.digital

EXCEED CUSTOMER EXPECTATIONS!

One Page CHECKOUT 1.2 simplifies the number of steps required for registered and guest customers to complete the checkout process. It's now just a **single step** instead of the standard three pages used for shipping, billing and placing an order. This easy-to-integrate solution is designed to help **reduce cart abandonment**, increase revenue and conversion, and improve retention.

CUSTOMIZATION Services Available

FEATURES & BENEFITS

FLEXIBLE DESIGN

Switch to an **accordion-style design** that expands and collapses all the steps required to checkout, making the checkout page visibly shorter.

ENABLE/DISABLE A/B TESTS

Run A/B tests to **compare checkouts**, and **identify opportunities** to increase loyalty, drive sales, and generate additional revenue.

SHIP TO MULTIPLE ADDRESSES

Shoppers can now ship items in the **same cart** to multiple addresses.

SUMMARY DISPLAY FOR EACH SECTION

Shoppers can now **view and edit** previously entered information displayed in the summary for each section

USE THE SAME ADDRESS

By simply checking a box, shoppers can use the **same address** they entered in the Billing section in the Shipping section, saving them precious time.

BACK BUTTON FROM BROWSER

Configure where you wish to redirect shoppers (**previous page or previous section**) if they click on the back button.
